

Connect to Eduroam on Android

As a first step bring down the upper menu and hold long the Wi-Fi icon, this way a list of the available Wi-Fi connections will appear and you can also turn the Wi-Fi on or off here.

Make sure the Wi-Fi is turned on, then from the appearing Wi-Fi connection list choose „eduroam”.

Add the following data:

- EAP method: set to „PEAP”.
- Identity: **cusman@uni-corvinus.hu**
- Password: cusman password

Connect

Tap on „CA certificate” and from the list choose „Don't validate”. After this tap on the „Advanced” button.

The screenshot shows the 'eduroam' configuration screen on an Android device. At the top, the status bar shows the time 13:36, signal strength, and 57% battery. The header bar has a back arrow and the text 'eduroam'. The main form contains the following fields: 'EAP method' set to 'PEAP', 'Identity' set to 'tesztdol@uni-corvinus.hu', and a 'Password' field with masked characters. A red rectangle highlights a dropdown menu that is open, showing three options: 'Select certificate', 'Use system certificates', and 'Don't validate' (which is selected with a blue checkmark). Below this menu, the 'Auto reconnect' toggle is turned on. Another red rectangle highlights the 'Advanced' button at the bottom of the form. At the very bottom is a large blue 'Connect' button. The Android navigation bar is visible at the bottom of the screen.
