

## JSTOR – interactive AI-tool-test

### Key details:

- Tool availability: All users at your institution can access the tool [by logging into their personal JSTOR accounts](#). Users may also choose to toggle the tool off if preferred. A step-by-step guide on accessing and exploring the tool's features is [available on our support site](#).
- Account prompts: We'll introduce reminders to encourage users to log in or create accounts to access the beta feature.
- Beta updates: As an evolving tool, you can expect regular updates and feature enhancements. On-platform notifications will keep users informed of new features and any temporary issues.
- Terms of use: This tool is governed by JSTOR's [Terms & Conditions of Use](#) and your institution's license agreement. Please review the tool's [Legal notices](#) for further information.

### Access: To explore the tool yourself:

1. Go to [jstor.org](https://www.jstor.org).
2. Log in to your JSTOR account and make sure you also have access to your institution.
3. Run a search and open any journal article, book chapter, or research report to start using the tool. [Try it out with this example](#).
4. Share feedback using the thumbs-up or thumbs-down rating. For thumbs-down ratings, you may provide additional details to help improve the tool.

### Getting started resources: To support your institution in making the most of this tool, we've prepared the following:

- [Introduction and FAQ](#): An overview of the tool's capabilities and common questions.
- [Video tutorial](#): A quick guide on how to get started and use the tool.

- [Support article](#): A step-by-step guide on accessing and exploring the tool's features

Thank you for being a part of our journey to enhance research capabilities. We look forward to learning with you!
